

Integrating non-dispensing pharmacists into general practice

Expressions of Interest sought from general practices

Background

North Western Melbourne Primary Health Network (NWMPHN) is seeking 4 general practices within the north western Melbourne region to take part in a new program placing non-dispensing pharmacists into general practice.

There is strong evidence that a [team-based model of primary care](#) is more cost-effective, and can improve equity and access to health services. NWMPHN has commissioned the Pharmaceutical Society of Australia (PSA) to implement the *Pharmacists in General Practice* program to support the growing number of patients with complex needs.

General practices will benefit from:

- Access to an experienced pharmacist tailored to your practices' needs
- Increased time for GP consultations
- More integrated patient care
- A pharmacist who can support activities that enhance MBS billing
- A pharmacist who can respond to complex medicinal queries and provide education to practice staff

What is required?

- A private space or consulting room available 14 hours per week (days to be negotiated with the PSA) for 11 months
- The pharmacist will need to be able to access medical software (licensing fee paid by PSA)
- Current PEN CAT software license or willingness to sign a CAT Plus Agreement

How to apply

Send your completed EOI application form to amy.durmanic@nwmpHN.org.au by **4pm, 25 January 2018**. Please be aware that only **4 practices** will be selected to participate in this pilot program.
