- Immunisation
- Surgical

## SPOTLIGHT on statewide collaborations

### Paediatric HealthPathways

Victorian PHN Alliance is working with the Victorian Paediatric Clinical Network (VPCN) and the Better Access subcommittee, to translate existing state-wide Clinical Practice Guidelines (CPGs) into Paediatric HealthPathways appropriate for GP practice, which address low complexity, high volume paediatric conditions.

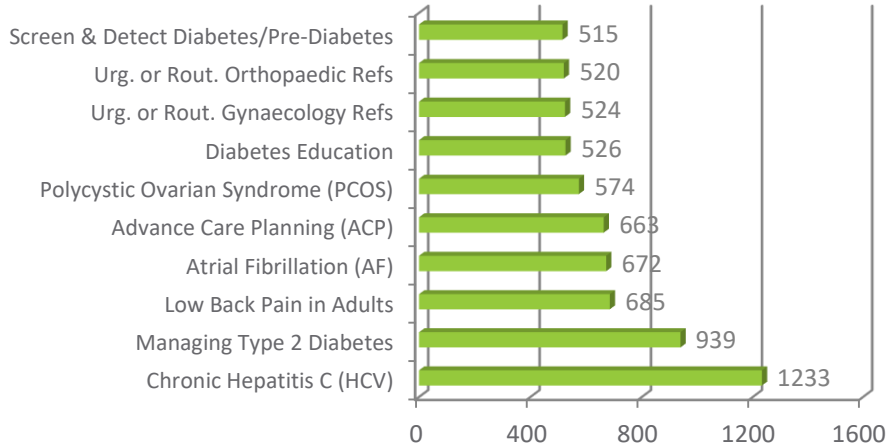

### Optimal Care Pathways (OCP)

HealthPathways are being revised or developed to complement the Optimal Care Pathways and facilitate better co-ordination and quality of care. Pathways for Lung and Colorectal Cancer have been completed and work continues on the prostate and gastro-oesophageal cancer pathways
