

How Can We Work Together?

THE GOOD DEATH INNOVATION Project

1. Purpose

To outline the purpose of establishing a project stakeholder group (**see below**). Refer to the 'Information Sheet' for more details about the project.

Our goal is to work with everyone including you, to better utilise the support and resources that everyone has, to provide a better care for our communities. We believe that a good teamwork is the key success to improve patient care experience. Therefore, we are keen to work with you in our project.

2. Membership

North Western Melbourne Primary Health Network (NWMPHN) is keen to work with key stakeholders to improve end-of-life care within north western Melbourne. We have identified you as one of our key stakeholders, and we would like to invite you to be our project stakeholder.

3. Role of stakeholders

As a key stakeholder we would like you to support this work as subject matter experts, to provide guidance, advice and, where relevant, recommendations. You can do this by:

- Helping to identify GPs with a special interest in end-of-life care, or GPs who are experienced in palliative care referrals;
- Reviewing and providing feedback on the content of the Continuous Quality Improvement (CQI) package;
- Providing advice to help support the implementation of the CQI package into practices;
- Sharing thoughts and providing feedback to assist NWMPHN teams in evaluating the engagement process including some of the project activities involved.

4. What does participation involve?

We recognise that you are busy and would appreciate any assistance you are able to offer. There will be opportunity to participate in a workshop to review the CQI package at some point.

5. For further information or enquiry

Please contact **Dr Cik Lee** or **Jesse Osowicki** via email (end_of_life_program@nwmpHN.org.au), or by telephone on (03) 9347 1188.
