

**Your practice
will gain exclusive
access to:**

- PEN CAT Osteoporosis tool
- CPD workshops and training
- Clinical and QI mentors
- Opportunity to share and learn from other general practices

Give your patients a reason to dance.

Sign up to the Osteoporosis Quality Improvement Project.

The Osteoporosis Risk and Management (ORMA) Project is a quality improvement activity designed to enhance detection and improve osteoporosis disease management in older adults.

Your general practice can make the difference. Early diagnosis and effective pharmacotherapy can reduce fracture risk by more than 50%.

16 general practices can be part of the ORMA project.
Your patients will be saying HIP HIP Hooray!

**Find out more at nwmphn.org.au/tenders
Applications close 5pm, 24 January 2020**

This project is a partnership between The Australian Institute of Musculoskeletal Science (AIMSS), the Melbourne Academic Centre for Health, University of Melbourne and North Western Melbourne Primary Health Network.
