

Benefits for your practice

- Education and training from subject matter experts
- Full support from our project lead
- Meet the requirements for PIP QI
- RACGP-accredited activity

Help cure hepatitis C

***Join a fully supported quality improvement activity
funded by the Burnet Institute.***

Receive education and training from hepatitis C specialists, Associate Professor Joe Sasadeusz and Dr Matt Penn, and form connections with your local hospitals.

Treatment is no longer difficult but there aren't enough patients being identified in our region. Your general practice can make the difference.

We will support you every step of the way.
