

Benefits for your practice

- Self-paced training
- Improve data quality
- Support to undertake quality improvement activities that contribute to PIP QI
- Encourage the uptake and use of digital health initiatives for providers and patients

Would you like free access to Train IT Medical's online learning management system?

Apply now to increase staff confidence to use your clinical software, improve data quality and uptake of digital health initiatives in your practice.

Train IT Medical is run by experienced practice manager Katrina Otto. Practices will receive support throughout the project from their NWMPHN relationship manager.

Practices will receive access to data quality and digital health modules in Train IT Medical's LMS. Currently only available for practices with MedicalDirector or Best Practice Software.
