

Benefits for your practice

- \$10,000 incentive payment for practices that complete this activity
- RACGP-accredited CPD activity
- Meet PIP QI requirements
- Facilitated learning workshops with subject matter experts
- Full support from NWMPHN

Did your patients put off cancer screening during COVID-19?

Join our quality improvement activity for general practices to increase screening rates and earn a \$10,000 incentive payment, CPD points and more.

There has been a 30 per cent reduction in cancer notifications in Victoria since COVID-19 restrictions were applied. There has also been a 32 per cent decrease in hepatitis B and C serology tests and a 17 per cent decrease in hepatitis B monitoring tests.

GP-endorsed letters, recall and reminder systems, and enhancement of clinical information systems are key to increasing screening rates.

We have partnered with Cancer Council Victoria, VCS Foundation and the Victorian Department of Health to support practices to complete this vital activity.
