Application  
pending for  
3 x RACGP CPD  
Activity points

### Learning outcomes:

- Improve skills and confidence to recognise, respond and refer for family violence
- Understand multidisciplinary roles in managing family violence
- Get to know local players – find out what local services are available and who to refer to/who your referrers are.

**Join this series of bi-annual events, which will bring together professionals from general practice, mental health and drug and alcohol services, hospitals and the family violence sector to foster interdisciplinary and cross-sector learning and pathway development.**

This local event will be facilitated by practicing GP and educator, Dr Jennifer Neil, and will include:

- An update on the new Family Violence Information Sharing Scheme and legal aspects arising from family violence, presented by Victoria Legal Aid.
- An expert panel case discussion and Q&A, featuring panellists from Western Health, Werribee Mercy Health, North West Mental Health, The Royal Children's Hospital, St Vincent's Hospital, Caring Dads, InTouch, and Odyssey House.
- Facilitated networking with local general practices, hospitals, mental health, drug and alcohol and family and domestic violence services.

While you are welcome to attend any of the events, we would encourage you to attend the one most relevant to the geographic area of your work to optimise your learning and networking outcomes.
