

Using the SC4C Referral Pop-Up

For our study, a **REFERRAL** is when you sending your patient to an **external health service or health provider**, outside of your GP practice

No Referral

- Patient returning to see you (GP)
- Includes ordering tests (pathology, imaging)
- When you are not in a patient consultation (i.e. only viewing/making notes in a patient's file), please select the correct *visit type* in Medical Director/Best Practice

Private Paediatrician

- includes general & specialists (developmental, cardiologist, neurologist etc.)

New Formerly Speech Therapist

Strengthening Care 4 Children

STRENGTHENING CARE FOR CHILDREN

Please indicate below where you have referred

Ms Melissa Andrews (12wks)

Tick all that apply

- Other

Save

Other Allied Health

- *New* mouse-over guidance text: *audiologist, occupational therapist, physiotherapist, dietician, social work etc.*

Other Public Hospital & Other Private Hospital

- *New*: now split into Outpatient & Emergency Department

Other

- Select this option when no other referral options are applicable

Re-appearing pop-up

- This pop-up is designed to automatically appear every time a GP closes a patient's file (<18 years old)
 - This is to allow you to record any changes to your referrals
- Please continue to select the most appropriate referral option (i.e. *No referral* - for Admin/Non-Visit (updating clinical notes only))
 - Researchers will 'clean' this data to determine a patient consultation visit vs. Admin visit (updating clinical notes)
