

POLAR Introduces a **Modular Approach** to Solve Your Complicated Problems

POLAR is an advanced web based analytics platform for Primary Care that can be as big or small as you like.

At the core of POLAR is data therefore POLAR can be a data extraction platform that can provide you clean mapped data with the advantage of mapped SNOMED diagnosis and other value adds to support your analysis. Data can be hosted in a safe secure environment controlled by us or pushed to a safe location of your choosing e.g. on premise server or the cloud.

POLAR can also be:

- ✓ A point-of-consultation tool to support your clinical and practice staff
- ✓ Analytics for your practice
- ✓ Analytics for your PHN or Corporate Office
- ✓ In the end POLAR can be exactly what you want or need

“The ability for practices to audit their data and identify improvement is integral. POLAR stands above the rest to help ensure continuous quality improvement and improve patient outcomes.”

Alex Dolezal
Digital Health and QI Team Leader
Central Eastern Sydney PHN
