

# HELP IMPROVE MEDICINE SAFETY IN AUSTRALIA

Join a Monash University Research Study

Do you take regular medications or manage multiple health conditions?  
Your experience matters — help us design better tools for safer medicine use.

## WHAT'S THE STUDY ABOUT?

We're developing a new model to help people manage their medicines more safely and effectively. This includes a mobile app and support strategies designed with input from real users like you.

## WHAT'S INVOLVED?

You'll be invited to join a 3-hour workshop (online or in-person) where you will:

- Share your experiences with medicine use
- Help shape the design of a new health app
- Identify what helps or hinders safe medicine use

In the weeks following, you will also complete a short follow up survey online.

## WHO CAN JOIN?

We're looking for patients who:

- Live in Victoria, New South Wales, or Tasmania
- Take regular medications or manage chronic conditions
- Are comfortable communicating in English

## PARTICIPANT APPRECIATION

You'll receive a generous gift card for participating in the research, redeemable at a range of popular everyday retailers.
