Pathways and Engagement Statistics

Top Searches & Most Viewed Pathways

- January recorded 48,269 total views, showing a small dip compared to December, which is typical for the post-holiday period.
- Hypertension (127) rose to the top search term for January, while Gout (122) and PCOS (112) also showed strong search activity.
- Antenatal Care – First Consult (350) remained the most viewed pathway in January with a clear increase from December (+70 views), while Abnormal Liver Function Tests, Hypertension and PCOS also continued to attract strong GP engagement.
- There is a visible alignment between top search terms such as Hypertension, Gout, PCOS, Antenatal, and Osteoporosis and the top GP-viewed pathways of the same names, suggesting a general connection between what users search for and the pathways they view.

GP Engagement

- With 2,200 registered users, GPs remain the largest and most active group, underscoring strong engagement across primary care.
- Total users increased from 3,788 to 3,909, and new users rose from 77 to 87, showing steady user growth despite the seasonal dip in activity; at the same time, engagement with key GP pathways strengthened, with Antenatal Care – First Consult rising from 280 to 350 views, Hypertension increasing from 181 to 205 and PCOS growing from 171 to 196.

Practice Nurses and Managers

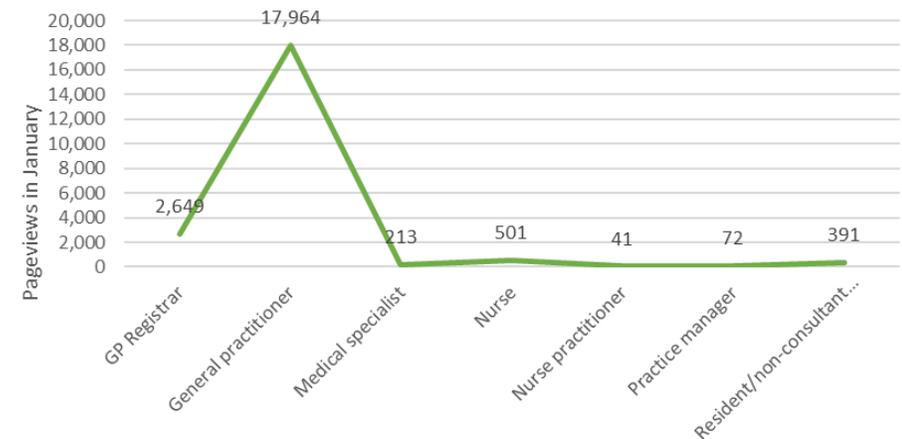

- Practice Managers: Increased activity on Guide to MBS pathway.
- Practice Nurses: Higher engagement with Aged Care Community assessment, Community nursing and smoking and vaping cessation pathways.
- Overall nurse engagement grew significantly in January, rising to 501 views compared with 246 in December.

Key Clinical Focus Areas

- Hypertension, Gout and PCOS were among the highest-searched topics in January, and this was reflected in their corresponding pathways, which also recorded strong engagement, suggesting consistent interest in chronic disease areas.
- Women’s health remained prominent, with Antenatal Care – First Consult continuing as the most viewed pathway and PCOS attracting both high search activity and pathway use
- Rhinosinusitis also appeared among the most-viewed pathways in January, aligning with the seasonal rise in upper-respiratory presentations typical at this time of year.

Who's engaging most with HealthPathways Melbourne

General Practitioners were the most active users on HealthPathways Melbourne in January, accounting for over 17,960 page views
